

HARDENER 3342 FOR DURAKOTE INT PU SEALER & TOPCOAT SILK MATT & MATT

Type	:	Isocyanate Hardener for two components PU
Field of Application	:	It is used for mixing with the base component of PU finishes for wood and furniture, coatings for plastics, anti-corrosion coatings and chemical resistant coatings.
Technical Data	:	
Specific gravity	:	0.95 ± 0.02
Colour	:	Colourless
Mixing ratio	:	As per recommendations given in the base paint technical data sheet
Directions for use	:	It should be mixed thoroughly with the base paint in the recommended ratio. Further dilution of hardener or contamination with oil, varnishes will adversely affect drying/hardness of PU Lacquers.
Directions for storage	:	Keep the cans tightly closed in a well ventilated moisture free place. Use anti-sparkle equipment and no smoking during handling and storage
Health & Safety information	:	Please refer to our Material Safety Data Sheet
